

Dual Degree: Associate in Arts and Associate in Science (62 Credits):

Description: This course path is for students who might not be sure which direction they're headed for their Bachelor's degree, but want a solid foundation in all common general education requirements. Benefits of this path include completion of the Michigan Transfer Agreement, completion of TWO Associate degrees, and completion of many common general education and program requirements for Bachelor degree programs. The compromises of this program are the lack of higher-level math and sciences courses for students committed to STEM fields.
